

Choose a language and start with online resources like tutorials, coding challenges, and beginner-friendly courses. Python is a popular choice for beginners.

“Write a Python function to check if a number is prime.”

```
def is_prime(n):  
    if n <= 1:  
        return False  
    for i in range(2, int(n**0.5) + 1):  
        if n % i == 0:  
            return False  
    return True
```

“Explain what an API is.”

An **API (Application Programming Interface)** is a set of rules and protocols that allows different software systems to communicate with each other, enabling them to exchange data and services. Think of it like a messenger between systems, helping them work together seamlessly.
